

Geriatrics and Office Oncology Update 2013

Learning Objectives

This interactive program is structured to:

- To review recent advances in geriatrics relevant to patient care
- To review recent advances in oncology relevant to a generalist physician's office practice
- To review recent advances in medico legal medicine
- To review topics in physician health with a view to changing physicians' attitudes and behaviours
- To develop a more global perspective on issues relevant to cardiology, medicine, patient health practices, health policy and administration (Global Medicine)

The program should appeal to generalists: family physicians and specialists who see patients with Geriatric and Oncology issues in their practice.
